Intel or Amd

When buying a new pc, you can see that the cpu is from Intel or Amd.

This text is about wich brand is better.

The main reason for choosing a Amd chip is that you get more from your Money, they offer you a better cpu refresh rate or have a better graphiccard for your money.

A good reason to buy a cpu from Intel is that more pcs have their chips inside.

So it depends if you want to spend lower then Amd is the better option but if you want to have a higher selection then i would say Intel.

Thank you for reading this text.
